

To whom it may concern,  
I am an over the road trucker and XMRADIO is the best thing to come down the road for truck drivers in years. The road and weather reports on XM help me to avoid traffic congestion and bad weather on this nations highways. Thus making the highways safer for the motoring public, not to mention making my job easier. I can't believe the regular radio stations are having a problem with this. It would seem to me that they are more interested in money then they are in highway safety, (kind of reminds you of some of the state laws doesn't it), anyway, I would like to voice my opion against NAB's ridiculous petition 04-160, as well as protect MY right to choose what I would like to listen to on my radio. Tell the regular radio stations to stop crying in their beer and improve what THEY have to offer, and spend their money on better programing instead of lobbyists, campaign contributions and political influence. Maybe if that had something to offer other than advertisements, someone would want to listen to them. In closing I ask you to vote in favor of XMRADIO, thank you for your time.
